Panorama Image Stitching | Python | [GitHub](#)

- A panorama like image creator built on Python
- Stitches multiple images into a single image
- Independent from number of input images
- Intelligently compensates for difference in lighting exposure, contrast errors
- No significant loss of image content and resolution
- Can take any and all input images with some overlapping area
- **Tech stack** - Python, OpenCV, Numpy

Neural Style Transfer | Python | [GitHub](#)

- Implementation of paper titled "A Neural Algorithm of Artistic Style" by Gatys et al.(2015)
- Takes two images as input i.e Content image and Style image
- Generates new image by blending contents of content image in style of style image
- **Tech stack** - Python, Pytorch, OpenCV, Matplotlib, Numpy, Pillow
